

New multifunctional Dock Fender

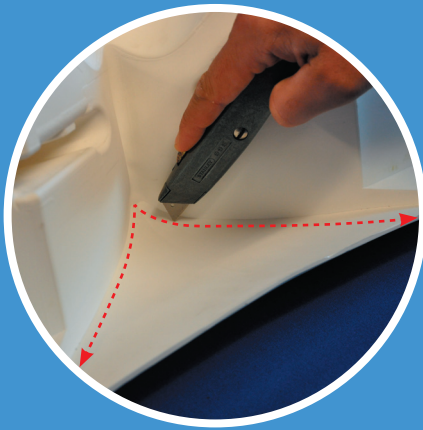

5 in 1

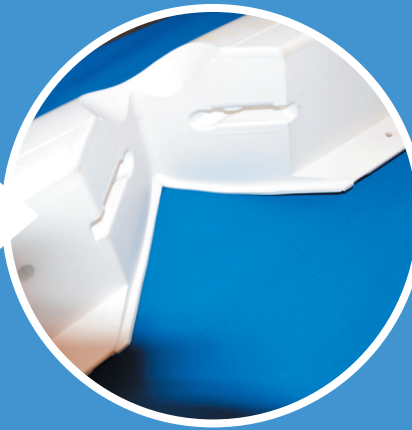

Guidance

How to convert the Dock Fender

Outside corner

Cut only along the marking (important).

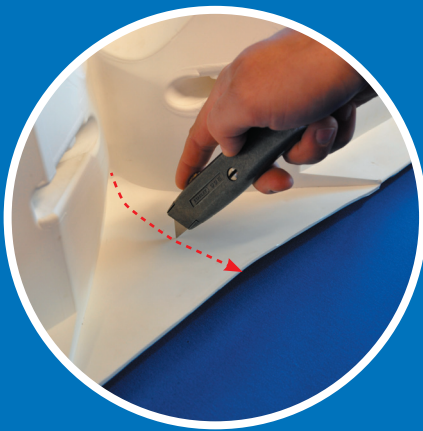

Result after cutting.

Converted into corner-fender.

Inside corner

Cut along the centre-marking.

Result after cutting.

Converted into open corner-fender.

Optional (integrate a DAN-FENDER item 520)

Push the rod/520 into the recess.

Result after correct mounted rod/520. The lower end/eye of the 520 should be secured to the dock also!

Correct inflation

The Multifunctional Dock Fender is a "low pressure" product and already inflated at delivery - Do NOT add more air/pressure prior to mounting! If extra air/pressure is needed later on, then use a compressor for easiest inflation.
